DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group I in Paper No. 10 is acknowledged.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 3. Claims 41 is rejected under 35 U.S.C. 102(e) as being anticipated by Sanielevici et al (US 6,018,553).

Referring to Fig.2, Sanielevici et al discloses a balanced receiver, comprising

"a first frequency down-conversion module" (201) for down-converting an input signal according to a first control signal (5KHz, 0DEG),

"a second frequency down-conversion module" (204) for down-converting the input signal according to a second control signal (5KHz, -90 DEG) and

"a subtractor module" (213) that subtracts the down-converted signal of the "second frequency down-conversion module" (204) from the down-converted signal of the "first frequency down-conversion module" (201).

Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
- 6. Claim 46 is rejected under 35 U.S.C. 103(a) as being unpatentable over Sanielevici et al (US 6,018,553) in view of Nash (US 6,317,589).

Sanielevici et al disclose all the subject matter claimed except for the subtractor being a differential amplifier. Nash teaches that a subtractor is typically a differential amplifier. Col.4, lines 45-46. Thus, it would have been obvious to one skilled in the art at the time the invention was made to implement the function unit of the subtractor (213) with a differential amplifier as taught by Nash.

7. Claims 42-45, 47-72 are objected to as being dependent upon a rejected base claim, but

would be allowable if rewritten in independent form including all of the limitations of the base

claim and any intervening claims.

8. Claim 77 is allowed.
